TACT AND TALENT .- Talent is something, but tact is everything; talent is serious, sober, grave, respectable; tact is all that, and more too. It is not an additional sense, but it is the life of the five; it is the open eye, the quick our, the judging taste, the keen smell, and the My touch. Talent is power, tact is skill, alent is weght, tact is momentum, talent knows what to do, tact knows how to do it. When you find a combination of both tact and talent in the same individual, you may set it down that he is equal to any emergency; and that is why J. M. He knows what to buy, and when to buy it; he knowe how to combine the useful with the or-namental; he displays his clothing and furnishing goods so that ther merits are easily dised, and his tact tells him that more money is made by selling two dolars' worth of goods, at fifteen per cent. profit, than one dol tar's at twenty-five per cent.
